Subject: RE: Online information --- [REDACTED]

[REDACTED]

Team CG,

I have a few outstanding questions on my tracking list regarding the Trump domain/server in anticipation of future AD and higher briefs of the matter.

- 1) On the information provided to the FBI 'anonymously' on October 2, what has investigation found regarding the "Person of Interest" allegedly working at Alfa Bank with home IP address 91.205.144.46 and work IP 217.12.97.137?
- 2) Regarding the paper released on mediafire.com, has investigation found an explanation for the summary statement "deleted host name mail1.trump-email.com is replaced with trump1.contact-client.com?"
- 3) Do we have reason to believe Dave Degan (SP?) at Georgia Tech (my school) is the author of the original white paper that started this investigation?

I apologize if you have answered any of these questions with me or others at HQ already and thanks for the help,
-Ryan

TRANSITORY RECORD

CG,

I am interested on your thoughts on the attached paper. This was found online at the address noted at the top of the paper (mediafire.com). Looks like the argument in this paper is largely supported by activity likely caused by our investigation and other acts by Central Dynamics, [REDACTED] maybe Mandiant, but I would like your technical opinion

SCO-3500U-016117

on this paper. Is this related to [REDACTED] and do we have information which can you help explain the 'new' trump email domain now pointed at the original server?

As Always, Thank you for the great work on this,
-Ryan
